

Actualization of Personal Potentials

COSMIC REALITY

wholeness of life is harmonizability

The potential of "harmonizability" actualizes in personal selfhood, because the part is subject to the context of the Whole (the Deity of the Mother), and because personality is a level of deified reality.

PERSONALITY

"harmonizing personal selfhood" & purpose of life is perfectibility

The potential of "perfectibility" actualizes in spirit substance, because personality (individuated will) is spirit pattern.

SPIRIT SUBSTANCE

"perfecting spirit" [= growth] & value of life is progressability

The potential of "progressability" actualizes in mind energy, because patterned spirit dominates mind (both mind activity and mind energy).

MIND ENERGY

"progressing mind" & meaning of life is adaptability

The potential of "adaptability" actualizes in living matter, because mind dominates matter (including matter engaged by life animation).

LIVING MATTER

"adapting life" & nature of life is variability

The potential of "variability" is a product of both the design of the living matter and the presence of life animation in that matter.

MATERIAL SUBSTANCE

"varying things" [= change (which material mortals first recognize)]

(study notes by Chris Halvorson)
